Chapters 22.900A through 22.900G shall be known as the “Fee Subtitle,” may be cited as such, and will be referred to herein as “this subtitle.”

### **22.900A.020 Purpose.**

- A. It is the purpose of this subtitle to prescribe equitable fees and fee collection policies for all services provided by the Department of Design, Construction and Land Use hereafter, "Department" or "DCLU" which are sufficient to support the permitting and permit inspection functions of the Department.
- B. An additional purpose of this subtitle is to prescribe special fees for testing, examination, registration, inspection, or the furnishing of certain services or materials.

### **22.900A.030 Payment and responsibility for fees.**

- A. No permit shall be issued or approved, no Certificate of Occupancy shall be issued, and no drawing or other data relating to such permit shall be examined until the corresponding fees prescribed by this subtitle have been paid.
- B. Unless otherwise specified in this subtitle, each distinct component of an application, review, or permit shall be charged as a separate fee.
- C. Both the applicant for the permit, and the owner of the property for which the permit is required, are jointly and severally responsible for payment of fees required by this subtitle, regardless of whether the permit is issued or whether the application is canceled or denied before permit issuance. However, when an applicant is not the owner and is not acting, even in part, as agent for the owner, the applicant is solely responsible for payment of applicable fees.
- D. The Director is authorized to accept as payment for fees contemplated under the ordinance codified in this subtitle the following forms of payment: U.S. currency, cashier’s checks, corporate checks, traveler’s checks, personal checks drawn on in-state banks, electronic funds transfers, and credit cards. Further, the Director has full authority to refuse any form of payment where the Director believes sufficient cause exists to question the City’s ability to collect full payment.

### **22.900A.040 Administration and enforcement.**

- A. For the purpose of this subtitle, the term "Director" means the Director of the Department or an authorized representative.
- B. The Director is authorized to administer, interpret, and enforce the provisions of this subtitle provided, that

The Director of the Department of Neighborhoods shall administer, interpret and enforce sections of this subtitle that are applicable to Certificates of Approval, Special Tax Valuation for Historic Properties and for environmental (SEPA) review of projects that include City of Seattle landmarks and projects located in special review districts or landmark districts; and

5. The Director of the Seattle Arts Commission shall administer, interpret and enforce sections of this subtitle that are applicable to Seattle Arts Commission review of projects.

C. The Director is authorized to collect fees listed in the preceding subsection for Seattle Transportation or Seattle Public Utilities, and to transfer those funds to them.

D. Where no definite method is prescribed in the subtitle for calculating the amount of fees, the Director may assess charges as required to cover costs.

E. The Director has full authority to specify the terms and conditions upon which services and materials are made available, and the fees as determined by the Director shall be consistent with the reasonable estimated cost to the City for furnishing such services or materials.

F. The total fee assessed for any permit, decision, review, inspection, or approval shall be rounded to the nearest whole dollar (rounded down: \$.01 through \$.50; rounded up: \$.51 through \$.99).

## **22.900A.050 Transition.**

**Notes to Table C-1:**

1. The hourly fee shall be charged for hours in excess of the review hours covered by the minimum land use review fee.
2. Low-income housing is housing which satisfies the definition of “low-income housing” in SMC 23.84.024. At least fifty percent of the total gross floor area of each structure on the site shall be committed to low-income housing use for at least 20 years.
3. A flat fee of \$430 shall be assessed by DCLU for Determinations of Non-significance (DNSs) and Mitigated Determinations of Non-significance (MDNSs) for projects that include City of Seattle landmarks and projects located within a special review or landmark district. No hourly fees shall be assessed for these types of approvals unless DCLU is the lead agency.
4. The single variance fee shall be applicable whether the project requires one or multiple variances.
5. Includes short subdivisions in environmentally critical areas.
6. Includes full subdivisions in environmentally critical areas.
7. This fee applies when design review is initiated only for tree protection and the application has no other Type A or B components.
8. The minimum fee is applied to the cost to fabricate, install and remove the environmental review sign. If the sign is removed or defaced before the final City decision, the applicant will be responsible for paying the vendor contracted with the City to repair or replace the sign.
9. The fees for interpretations of SMC Chapters 25.12, 25.20, 25.22, and 25.24 shall be collected by the Director of the Department of Neighborhoods.
10. Additional notice may be given in circumstances including but not limited to the following: reinstallation of environmental review signs, reposting of the land use review or environmental signs, new component reviews added subsequent to the original notice, revised decisions, and changes to the scope of the project.
11. This fee is not refundable and shall be applied towards the permit application fee if an application for a permit is made within 6 months of the date of the pre-application conference and if the project is identified by address at the time of the pre-application conference. The pre-application conference fee covers a one hour conference. Additional pre-application review time will be charged at the hourly rate. See also Section 22.900C.010.E
12. The three classes are defined by Director's Rule 3-94.

**G. Refunds.**

1. Nonrefundable Fees. Fees for preapplication conferences and environmental signs are not refundable.
2. Calculating Refunds for Land Use Fees. The amount of land use review fee that may be refunded is calculated as follows.
  - a. For refunds requested before a required notice is complete, the amount eligible for refund is 75 percent of the minimum land use review fee plus 100% of the hourly deposit, if any, paid by the applicant.
  - b. For refunds requested after notice is complete and for applications for which notice is not required, the amount eligible for refund is the number of hours of review time multiplied by \$250, subtracted from the amount paid by the applicant. The amount refunded shall not exceed 75 percent of the minimum land use review fee.

## **CHAPTER 22.900D — FEES FOR NEW AND ALTERED BUILDINGS AND EQUIPMENT**

### **22.900D.010 Development permit fees.**

#### A. General.

The development fee shall cover the application, review and inspection process associated with new construction, additions, alterations, and repairs to existing buildings and establishment of use. The development fee shall consist of a permit fee and, where plans are reviewed, a separate plan review fee. The permit fee and plan review fee shall be determined based on valuation, except as provided below.

#### B. Time of payment of fees.

Fees collected at the time of application will be based on Department estimates of the total fees due at the time of permit issuance. The final Department fees will be recalculated during review, and any additional amount due shall be collected prior to the issuance of the permit, approval, denial, decision or recommendation, provided that hourly fees may be collected earlier, as described in Section 22.900B.010 D. Any fee in excess of the final calculated fee shall be refunded pursuant to Section 22.900B.050 and 22.900D.010 K.

If, during the initial review, the previously-collected fee is determined to be less than 90% of the estimated fee, the review work subsequent to the initial review will not proceed until the discrepancy is paid to the Department.

1. Amount due prior to application. Fees for building preapplication conference shall be paid prior to the conference. See 22.900D.010 I for building preapplication conference fees.

2. Amounts due at time of application. The following amounts are due at the time of application.

a. Applications for building and/or mechanical permits without plan review shall pay a fee for subject-to-field inspection (STFI) permits equal to the permit fee specified in Table D-2.

b. Applications for Building and/or Mechanical permits with plan review shall pay the plan review fee plus one-half the permit fee as specified in Table D-2.

c. For other applications, the minimum fee shall be collected at the time of application.

#### C. Determination of value.

1. The Director shall determine the value of construction for which the permit is issued (the estimated current value of all labor and materials, whether actually paid or not, as well as all finish work, painting, roofing, electrical, plumbing, heating, air-conditioning, elevators, fire-extinguishing systems, automatic sprinkler systems, other mechanical systems, retaining walls, rockeries and any other permanent work or permanent equipment, but not including furnishings). The building valuation data from

the International Conference of Building Officials (ICBO) as published in "Building Standards" and other valuation criteria approved by the Director will be used to determine the value of construction.

2. Dish or panel antennae. The fee for processing applications for installation of a dish or panel antenna shall be charged on the value of the foundation and supports constructed for the installation. The value of the dish or panel antenna shall not be included in the determination of value.

3. The development fee for parks and playgrounds shall be based on the project value, including the value of improvements for structures incidental to the park or playground such as retaining walls, rockeries and restrooms, but shall not include the value of playground equipment.

4. The valuation shall be based on the highest type of construction to which a proposed structure most nearly conforms, as determined by the Director.

D. Phased permits.

1. When a new building project is proposed to be built in phases and the Director determines that separate development permits may be issued for portions of the project, the development fee for initial permits shall be based on the estimated value of the work under that permit according to Table D-2, except excavating permits shall be based on Section 22.900D.145. The fee for the final permit shall be the fee based on the total value of the new building project minus the sum of the fees for the initial permits, with no credit for an excavation permit fee.

2. In addition to the fee specified in 22.900.010 D 1 above, where an applicant requests division of an already-submitted permit application with a value of \$5,000,000 or less into separate applications, a fee of one times the Base Fee shall be charged for each separate application (including the original application which results from the division). Where the application has a value of more than &5,000,000 the additional fee shall be two times the base fee for each application.

E. Calculation of development fees.

The development fee for a permit shall be calculated as described in this section. Table D-1 establishes the Development Fee Index for value-based development fees. Except as specified in Section 22.900D.010 F below, Table D-2 establishes the permit fee and plan review fee, calculated as a percentage of the Development Fee Index where determined by value. If two or more buildings are allowed under one permit, they shall be assessed fees as separate buildings under Table D-2. The individual fees shall then be added to determine the total development fee for the permit.

**Notes to Table D-2:**

1. The minimum permit fee or plan review fee for value-based fees is \$95.00.
2. The minimum fee for accessory dwelling units is \$180.00.
3. When there is no separate mechanical permit, the value of mechanical equipment included in the building permit application shall be included in the project value for the building permit.
4. This fee is applicable only to those initial tenants that reflect the use and occupancy established in the shell and core permit. The value used shall be the new construction value used in calculating value for the core and shell permit.
5. When a swimming pool is located within an enclosed building and is included in the building plans for that building, a separate fee shall not be charged for the swimming pool. The swimming pool area will be considered as floor area of the principal occupancy of the building.
6. This fee shall not apply to any on-site, temporary construction office where a valid building permit is in force.
7. All costs to the City for site cleanup shall be deducted from the deposit before the deposit is refunded.
8. Master use permit fees for such temporary uses shall be charged according to Table C-1.

F. Blanket Permits.

1. The application fee for a blanket permit to cover initial nonstructural tenant alterations within the first three years of the first tenant alteration permit shall be charged at the rate of \$3.20 per 100 square feet of space to be improved within the life of the permit. A deposit based on the estimated value of the work to be completed during the life of the permit shall be collected at the time of application. As individual tenant spaces are reviewed, the amount of the fee equivalent to the floor space examined shall be deducted from the deposit per Table D-2.

2. The application fee for a blanket permit to cover nonstructural tenant alterations in previously-occupied space, or to cover initial nonstructural tenant alterations after three years of the first tenant alteration permit, is \$95.00. A deposit based on the estimated value of the proposed work within 18 months shall be collected at the time of application. As individual tenant spaces are reviewed, the fee for the work to be done shall be calculated according to Table D-2 and deducted from the deposit.

3. When the estimated blanket fee deposit is used up in less time than the life of the permit and work remains to be done, an additional deposit shall be paid based on the estimated floor area remaining to be improved during the remaining life of the permit. When a portion of the deposit is unused at the end of the life of the permit and work remains to be done, credit for the balance of the deposit may be transferred from the expiring permit to a new blanket permit. To minimize additional accounting costs associated with blanket permits, where more than two deposits are made during the life of a blanket permit, the minimum amount of each subsequent deposit shall be \$2,000.00.

G. Revisions to Issued Permits.

Fees for revisions to issued permits shall be charged according to standards promulgated by the Director that approximate the additional cost of reviewing the revisions. A nonrefundable fee of one times the Base Fee shall be paid at the time the revisions are submitted.

H. Certificate of Occupancy

The issuance of a Certificate of Occupancy for existing buildings, either where no Certificate of Occupancy has previously been issued or where a change of occupancy is requested, requires a building permit. When there is no construction valuation (there is no work which would require a building permit), the minimum building permit fee shall be assessed. In addition to the minimum building permit fee, where records research, plan examination or inspection is required, charges shall be assessed at the rate of \$125.00 per hour. Where work is being done as authorized by a permit, the permanent Certificate of Occupancy fee is not assessed in addition to the building permit fee. The fee for a temporary Certificate of Occupancy shall be charged at the rate of one-half the Base Fee. The fee for the duplication of a Certificate of Occupancy is \$16.00 unless records research, plan examination or inspection is required, in which case charges shall be assessed at the rate of \$125.00 per hour.

I. Building preapplication conferences.

1. Required building preapplication conferences. When there is a requirement for a preapplication or predesign conference, such as buildings subject to the Seattle Building Code special provisions for atria (Section 402), or highrise buildings (Section 403), 35% of the estimated plan review fee for the structure shall be charged and paid as specified in Section 22.900D.010.B, and applied toward the development permit fee. (See Table C-1 for land use preapplication conference fees.)

2. Other building preapplication conferences. When a preapplication conference is requested by the applicant but is not required by Code, a fee equal to one and one-half times the Base Fee shall be paid no later than the time of the conference. Such fee is required for each meeting held on a project, and will be applied toward the future permit application fee provided:

- a. The project is identified by the proper address at the time of the preapplication conference; and
- b. The permit application is made within six months of the date of the preapplication conference.

J. Correction penalty fee.

After written notice to the applicant, a penalty fee of \$250.00 will be charged for each additional correction cycle required due to lack of adequate response from the applicant.

K. Refunds.

1. Refunds of development permit fees shall be calculated as specified in Table D-3. See also Section 22.900B.050.

2. Refunds shall not be given for the following fees:
  - a. Demolition permits;
  - b. Renewal or reestablishment of permits; and
  - c. Preapplication conferences.

1. Fifty percent of the estimated permit fee is paid at the time the application is submitted. The amount refunded before the permit is issued is a percentage of the fifty percent.

2. After the permit is issued, the entire permit fee has been paid. Therefore, the amount to be refunded after issuance is based on 100 percent of the permit fee.

**L. Renewals.**

Fees for renewal of permits shall be charged according to Table D-2. When the fee for a new permit would be less than one and one-half times the base fee, then the fee to renew the permit shall be the same as for a new permit.

**M. Reestablishment.**

The following fee shall be charged for reestablishment of development permits.

1. One and one-half times the Base Fee; plus

2. If plan review had been required for the original permit, an additional amount of \$1.50 per \$1,000.00 of value of work that was not completed and inspected under the expired permit shall be charged; plus

3. If changes are made to the original plans, an additional fee shall be charged for inspection and/or plan examination at \$125.00 per hour.

The maximum fee for reestablishment is ten times the Base Fee.

When the fee for a new permit would be less than one and one-half times the Base Fee, then the fee to reestablish the permit shall be the same as for a new permit.

(Parking facilities within buildings shall be charged fees in accordance with Section 22.900D.010.)

- B. In determining the area of the parking facility, all aisles and landscape areas internal to the parking facility shall be included. Driveways to the parking facility and landscape areas on the periphery of the parking facility shall not be included.
- C. These fees shall not apply to any parking facility which is underground and within a structure or on the roof of a structure, or to any extension of a parking facility which is primarily under a building, provided that the uncovered extension is no more than four feet beyond the footprint of the building. A. Mechanical permit fees for the installation, replacement or major alteration of heating equipment, incinerators and other miscellaneous heat-producing appliances shall be charged as set in Table D-8. Fees shall be charged for each furnace when it is applied for without plans. No separate fee shall be charged for a furnace when it is included in plans for a mechanical air-moving system submitted for a mechanical permit.

B. Mechanical permits are considered part of a building permit, with no additional fee, when mechanical plans are reviewed at the same time as structural and architectural plans for the same building project. The fees for a separate mechanical permit for installation, alteration or repair of mechanical air-moving systems, including ducts attached thereto, associated nonresidential heating and cooling equipment, and mechanical exhaust hoods, including ducts attached thereto, are charged per Table D-2.

The Director may require verification of the stated cost of any work subject to these fees.

When the cost of any proposed installation is unknown, an estimate of the cost shall be made and used to compute the permit fee.

The permit fee specified in Table D-14 is due at the time of application. Upon completion of the installation, a fee adjustment may be made in favor of the City or the permit holder, if requested by either party.

2. Permit fees for temporary electrical installations shall be charged for services only at the rate set forth in Table D-15.

D. Phased permits.

1. When an electrical project is proposed to be installed in phases and the Director determines that separate electrical permits may be issued for portions of the

project, the permit fee for the initial permits shall be based on the estimated value of the work under that permit according to Table D-14. The fee for the final permit shall be the fee based on the total value of the electrical installations minus the sum of the values of the initial permits.

2. Where an applicant requests that an application for a permit be divided into separate applications subsequent to the initial submittal of a unified application, an additional fee shall be charged at the rate of one times the Base Fee for each separate application which results from the division.

**22.900D.160 Sign, billboard, awning and canopy permit fees.**

A. Permanent signs.

For permanent signs, a permit fee of \$80.00 shall be charged for the first 100 square feet or less of the total display area of the sign plus an additional charge of \$6.50 for each ten square feet or fraction thereof of total display area in excess of 100 square feet. Each sign or group of signs for a single business entity installed simultaneously on a single structure shall be charged a separate permit fee per business entity. The addition of a sign or group of signs for one business entity to the structure requires a separate permit.

B. Sign measurements.

All signs erected or painted simultaneously for a single business entity, provided they are on a single structure, shall be measured together and assessed a fee as if a single sign.

Directional ground signs between 5 and 7 square feet may be measured together and assessed a fee as if a single sign.

C. Sign area.

For the purpose of this section, sign area shall be measured in accordance with Section 23.86.004 of the Land Use Code.

D. Wall signs.

The maximum fee for signs painted on or otherwise applied directly to the building wall without a frame or mechanical fasteners is \$305.00.

E. Awnings and canopies.

A separate permit fee is required for the installation of awnings and canopies. The fee assessed for the installation is based on the valuation of the awning or canopy and is 100% of the Development Fee Index as calculated according to Table D-1. This fee is separate from the fee for any sign on the awning or canopy.

F. Signs on awnings and canopies.

A permit fee separate from the awning permit fee is required for a sign installed or painted on an awning or canopy. Signs for separate business entities are assessed a separate fee whether or not on a separate awning or canopy. All signs for each business entity installed concurrently on an awning or canopy shall be measured to determine the total square footage and shall be assessed a fee as though one sign. The subsequent addition of a sign or group of signs for one business entity requires a separate permit.

through negotiations with the Budget Director and the Design Commission. Billing shall occur in accordance with a schedule agreed upon by the Budget Director and the Design Commission.

C. 1. For City capital improvement projects, as defined in Section 3.58.020, for which no billing commenced under subsection A or B on or before December 31, 1998, and that do not fall within an exception in subsection D of this section, the Budget Director, the Design Commission, and each affected City department will attempt to agree on that department's projects, that are expected to be assessed by the Design Commission in the following year. If no agreement is reached by a date established by the Budget Director, the Budget Director will establish the list of such projects. The Budget Director may establish the assessable appropriation of a City capital improvement below the actual appropriation in order that the project not be assessed an unduly high fee relative to the cost of the anticipated Design Commission review.

2. The Budget Director will assess a uniform fee of up to one percent of the total of all departments' capital improvement project appropriations for those projects assessable for Design Commission fees. Such fee shall be set so as to be sufficient, when combined with other funding sources, to support the anticipated costs of the Design Commission for the following year, but in no case shall the fee exceed one percent.

3. The Director of Design, Construction and Land Use shall bill each department in the amount determined by the Budget Director, and that amount shall be paid by fund transfer to the Department Operating Fund.

4. If a capital improvement project's appropriation has been included in a fee assessed under this section, but Design Commission review of that project is delayed into a future year, that appropriation amount shall not be counted again in the calculation of the fee for any future year. If review of a project on which a fee has been assessed under this subsection C is canceled, or if review commences on a project that, but for timeliness, would have been included but was not included in the calculation of a fee under this subsection C, the Budget Director shall adjust the department's total assessable appropriation downwards or upwards, respectively, when establishing the subsequent year's fee.

D. Special Exceptions.

The Commission will bill the following projects at the hourly rate of \$100.00 per hour per Commissioner for subcommittee review, or \$700.00 per hour for full Commission review, except that fees may be waived, in whole or in part, at the discretion of the Commission with the concurrence of the Budget Director in the following circumstances:

1. Whenever Commission fees, if charged, would be disproportionate to the sums available and could cause abandonment of the project for the following types of projects: artworks, projects funded by grants and donations, neighborhood self-help projects undertaken by volunteers and nonprofit organizations, and small capital improvements;

2. For low-income and special needs housing projects subject to Design Commission review.

E. Street Use Permit Reviews.

Street use permit reviews, which are required before issuance of a street use permit for improvements within the public right-of-way, will be billed at the hourly rate of \$100.00 per hour per Commissioner for subcommittee review, or \$700.00 per hour for full Commission review. Billing will be sent to Seattle Transportation for inclusion into the plan review costs charged to the applicant, or be billed directly by the Department. For those projects billed through Seattle Transportation, payment will be made by a fund transfer from the Seattle Transportation Operating Fund to the Department Operating Fund from funds paid by the applicant.

F. Early Master Use Permit Stage or Projects Outside City Contract Process.

For design review at an early Master Use Permit stage or for projects outside The City of Seattle contract award process, Design Commission fees will be billed by the Department at an hourly rate of \$100.00 per hour per Commissioner for subcommittee review, or \$700.00 per hour for full Commission review.

This fee is collected for SeaTran for shoring projects adjacent to the public right-of-way; it is for the review of utility conflicts, bonding, and temporary use of the right-of-way, and for a deposit to pay for inspections during construction.

**22.900G.030 Fees for review by the Seattle-King County Department of Public Health (Fuel-gas piping).**

- C. A reinspection fee for fuel gas piping of \$40.00 may be assessed for each inspection when such portion of work for which inspection is called is not complete or when corrections called for are not made. This is not to be interpreted as requiring inspection fees the first time a job is rejected for failure to comply with the requirements of this Code, but as controlling the practice of calling for inspection or reinspection.

Reinspection fees may be assessed when the permit is not properly posted on the work site, the work to be inspected is not under test, and for failure to make required corrections. To obtain a reinspection the applicant shall file an application therefore in writing upon a form furnished for that purpose, and pay the reinspection fee in accordance with this code. In instances in which reinspection fees have been assessed, no additional inspection of the work will be performed until the required fees have been paid.

#### **Building code council account — Building permit fee.**

(1) There is hereby created the building code council account in the state treasury. Moneys deposited into the account shall be used by the building code council, after appropriation, to perform the purposes of the council.

(2) All moneys collected under subsection (3) of this section shall be deposited into the building code council account. Every four years the state treasurer shall report to the legislature on the balances in the account so that the legislature may adjust the charges imposed under subsection (3) of this section.

(3) There is imposed a fee of four dollars and fifty cents on each building permit issued by a county or a city, plus an additional surcharge of two dollars for each residential unit, but not including the first unit, on each building containing more than one residential unit. Quarterly each county and city shall remit moneys collected under this section to the state treasury; however, no remittance is required until a minimum of fifty dollars has accumulated pursuant to this subsection.

## **I. Rules 1-2000 and 8-2001 Rescinded**

### **Rule**

Director's Rule 1-2000, Implementation of the Fee Subtitle, and Director's Rule 8-2001, Application of the 2001 Fee Subtitle to Specific Fees, are rescinded by this rule.

## **II. Refunds**

Applicants may request a refund of fees at any time before their application is cancelled or their permit expires.

The Director may notify applicants and permit holders that an application will be canceled or a permit will expire. In conjunction with this notice, the Director shall offer the applicant an opportunity to request a fee refund. If the request is not made within 30 days of the date of the notice, and if the application is cancelled or the permit expires, the applicant or owner will no longer be entitled to a refund.

Payment of a refund will result in cancellation of the application or permit. The amount to be refunded, if any, will be determined by the Director according to the Fee Subtitle.

## **III. Revisions of Applications**

Section 22.900B.060 of the Fee Subtitle reads as follows:

### **Revisions and additions to applications.**

A. According to standards promulgated by the Director, the Department may assess an additional fee for the plan examination of previous designs when a subsequent redesign of a project is submitted prior to permit issuance. The revision fee shall be assessed at the hourly rate not to exceed the fee that would have been charged for the original design. The total fee is the fee for the final design plus the revision fee.

B. The Department may assess a fee in addition to fees already charged for the original permit if the applicant makes an amendment to an existing unexpired or reestablished permit. The applicable fees will be assessed for all work necessary to process the amendment, including Seattle Transportation or Seattle Public Utilities review associated with the submitted amendment.

Section 22.900D.010 of the Fee Subtitle reads as follows:

**Development Permit Fees.**

G. Revisions to Issued Permits. Fees for revisions to issued permits shall be charged according to standards promulgated by the Director that approximate the additional cost of reviewing the revisions. A nonrefundable fee of one times the Base Fee shall be paid at the time the revisions are submitted.

**Rule**

The following guidelines shall apply to the assessment of plan revision fees.

A. It is the policy of DCLU:

1. To encourage design modification during the environmental review process to mitigate adverse impacts.
2. To recover costs of time spent on the examination of plans which the applicant decides, independent of DCLU requirements, to substantially revise necessitating re-examination.
3. To charge revision fees in a consistent manner where they are applicable.

B. Definitions:

1. **Major Revisions** - Major revisions which may be subject to a revision fee include:
  - substantial changes in the scale of the structure;
  - substantial changes in the structural design, such as changing from wood frame to reinforced concrete;
  - change in the type of construction;
  - changes in occupancy that require extensive changes to the construction and life safety design of the structure;
  - moving the structure on the site, resulting in a totally new layout;
  - a totally new design.
2. **Minor Revisions** - Revisions which do not meet the above definition for Major Revisions.

C. Standards:

1. Revision fees will be assessed differently depending on whether the plans have been completely approved (ready-to-issue or issued permits) or are still within the correction cycle.

2. The nonrefundable fee paid when revisions are submitted will be subtracted from the total amount owed calculated according to this Rule.
3. Revision fees will be determined according to the following table.

Revisions submitted:	Extent of Revisions	
	Minor	Major
<b>Before permit is approved for issuance</b>	No fee	Hourly for time spent on previous designs, but no more than the estimated plan review fee for the highest-valued of the previous designs plus the development fee based on the value of the final design.
<b>After approval, but before issuance</b>	The greater of (1) the fee for the additional value or (2) the hourly fee for the time spent on the revision.	Hourly for the plans examination time spent on the original design plus the development fee based on the value of the final design.
<b>After issuance</b>	The greater of (1) the fee for the additional value or (2) the hourly fee for the time spent on the revision.  No fee will be charged for minor revisions approved in the field.	New permit is required.

4. Revision fees will not be assessed for changes in direct response to correction requirements. However, if the scope of the changes far exceeds the requirement of the correction, a revision fee will be assessed.
5. For Land Use review of a Master Use Permit application charged at an hourly rate, modifications to building size, location or design during the review process will be charged at the same hourly rate. An additional revision fee for zoning review may be assessed at the hourly rate if the revision far exceeds the requirement of the correction.
6. Major revisions, as defined above, may require a new permit or may require extensive rerouting. The Manager of the Plans Examination Section should be consulted to help in this determination.
7. There will be no refund of the plans examination fee paid when major revisions occur after issuance of the permit.

## IV. Alterations and Repairs to Existing Buildings

Section 22.900D.010 provides that alterations and repairs to existing buildings be charged on a valuation basis. This rule establishes a general basis for determining the value of the project where the value as specified by the applicant for the cost of alteration or repair work does not appear reasonably accurate.

### Rule

The fees for alterations and repairs to existing buildings shall be based on the value of construction as set forth in Section 22.900D.010. In general, the value specified by the applicant will be used to calculate the fee. However, if the value appears understated, the value shall be determined by using Table A below.

The Department shall determine the value of new construction which cannot be computed by the gross floor area, such as towers, retaining walls, foundations, repair of a beam, or addition of a stair. This value shall be the full estimated cost of all labor and materials whether actually paid for or not, and may be based on information submitted by the applicant.

Prior to the issuance of a permit, the applicant may submit evidence of the actual value of labor and materials, such as contracts or bid documents, to the Department. The Department may rely on this evidence to determine the value of construction.

**Table A**

Extent of Alteration	% of Building Valuation Data Figure <sup>1</sup>	Definition <sup>2</sup>
Minor	20%	Cosmetic work - refinishing walls, ceilings, floors; minor mechanical, electrical, plumbing; no structural work.
Medium	40%	Addition or removal of some walls or extensive construction of partitions; projects with more involved mechanical, electrical, plumbing work, such as residential additions or renovations of bathrooms and kitchens, commercial replacement of major HVAC components or of ceiling grids; refinishing of many existing walls, ceilings, floors; replacement of substantial portions of the glazing systems if a major portion of the project; moderate projects may include minor changes to the exterior envelope or structural systems

<sup>1</sup> Calculated valuation for new construction of the area per SMC 22.900D.010.

<sup>2</sup> The extent of alteration includes one or more of the elements in the definition. The floor area affected shall be calculated on the entire areas of the rooms where alterations are proposed. If a project has areas for which it is reasonable to distinguish as being of different categories, it is appropriate to calculate the areas separately to develop the DCLU value.

Major	60%	Addition or demolition of many walls; installation of new glazing systems in conjunction with major remodeling; upgrade of structural systems in some portions to receive increased loads in limited areas or structural repair of significant elements in limited areas. Significant upgrades to mechanical, electrical and plumbing systems in conjunction with significant refinishing of surfaces.
Full	80%	Demolition of all non-structural portions leaving a structural shell; installation of new or substantial replacement of electrical, mechanical systems in conjunction with significant changes in room configuration; significant structural upgrading to meet seismic requirements, or other substantial structural renovation, extensive structural repair.

## V. Building Valuation Data

Section 22.900D.010.C specifies that the Director shall determine the value of construction for which a permit is issued. It further specifies that building valuation data from the International Conference of Building Officials (ICBO) as published in "Building Standards" and other valuation criteria approved by the Director will be used to determine the value of construction.

The ICBO Building Valuation Data (BVD) is updated in April of each year to adjust for changes in the average cost of construction for the various occupancies and types of construction. Beginning on January 1 of each year, the Department will use the updated BVD tables from the previous April. This will assist the Department to keep its fees more in line with market changes. Using the current BVD should also help the Department avoid the need to make large incremental changes in valuations that can occur when a cycle or two of BVD has been skipped. Since 1998, it has been DCLU's policy to use the most recent BVD to determine the value of construction.

ICBO recommends that regional modifiers be used to adjust the BVD. However, the Department has not used the regional modifier in the recent past, and does not plan to use it in the future. The modifier for Washington is an average based on costs in the entire state, and does not reflect the actual costs in Seattle. As a result, the Department has used values that are 100 percent of ICBO's BVD. The modifiers for other large cities, such as San Francisco, are 100 percent or more.

### Rule

The BVD published by ICBO shall be used to determine the value of construction according to Section 22.900C.010. The regional modifier recommended by ICBO will not be applied. Beginning on January 1 of each year, the BVD from the previous April will be used for the year.

The following will be used to provide additional guidance in determining the value of construction.

## A. General

The permit fee for new construction and additions (*e.g.*, new floor area) shall be based on the value as determined by the plans examiner using the BVD.

## B. Alterations

In general, the fee assessed for alterations of existing floor area, retaining walls, towers, foundations of phased permits, etc. will be based on the applicant's value. Refer to Part IV of this rule and DCLU Guideline G3810 for additional information.

## C. Occupancies Not Listed in BVD

1. Not all occupancy types are listed in the BVD. For occupancies which are not listed, or for small structures which are not normally listed as an occupancy, the valuation for the occupancy which most closely resembles the proposed construction shall be used.
2. To assist in determining the appropriate category of a building project or portion of a building project, the following general definitions shall apply:
  - a. "Apartment house" includes other residences and special residences of Group R-1 occupancy.
  - b. "Convalescent hospital" includes special health care facilities.
  - c. "Industrial plant" includes shops.
  - d. "Service station" includes repair garages.
  - e. "Theaters" includes ballrooms and other such halls.
  - f. "Medical office" includes clinics.

## D. Construction Types Not Listed in BVD

1. Not all construction types are listed for each occupancy. The following conversions will be used to establish a per-square-foot valuation for construction types not specifically listed. The valuation obtained by using the conversion table should be rounded to the nearest tenth of a dollar.
  - a. I- or II-FR = 1.3 (III-1 hour)
  - b. II-1 hour = V-1 hour
  - c. II-N = V-N
  - d. III-1 hour = 1.15 (V-1 hour)
  - e. III-N = III-1 hour
  - f. IV-H.T. = 1.15 (V-N)
  - g. V-1 hour = 1.05 (V-N)
  - h. V-N = .95 (V-1 hour)
  - i. Warehouse tilt-up design, unrated =

(Warehouse, III-N) x (Ind. Plant tilt-up)  
Industrial Plant III-N

- j. Apartment house basement garage, Type V-1 hour =  
$$\frac{(\text{Apt. Type I, Bsmt Garage}) \times (\text{Public Garage V-1 hour})}{(\text{Public Garage Type I})}$$

#### **E Gross Area**

“Gross area” of a building project means the total area of all floors, measured from the exterior face, outside dimensions or exterior column line of a building, including basements, cellars and balconies, but not including unexcavated areas. Where walls and columns are omitted in the construction of a building, such as an open shed or marquee, or covered decks in multifamily residential or commercial construction, the exterior wall of the open side or sides shall be assumed to be the edge of the roof.

#### **F. Garages**

1. The distinction between “private” and “public” garage shall be as follows:
  - a. Private garages are Group U-1 occupancies with less than 1,000 square feet of floor area and are accessory to Group R-3 occupancies.
  - b. All other garages are public garages.

#### **G. Residential**

1. “Good” values are given under the category of “Dwellings” and “Apartment Houses”. The determination of which per-square-foot value to use is based on the anticipated plan examination and field inspection time, relative to the difficulty and uniqueness of the individual project.
2. For Types I- and II-F.R. construction, good values shall be used for high-rise buildings as defined in Seattle Building Code Section 403; average values shall be used for all other buildings.
3. For Types V-One hour and V-N construction, the average value shall be used except for the following:
  - a. Good values shall be used for dwellings with more than 3,000 square feet of living area.
  - b. Good values shall be used for additions when the combined area of the addition and the existing dwelling is more than 3,000 square feet of living area.
  - c. Good values shall be used for wood-frame apartment buildings with a separation conforming to Building Code Section 601.2.2.

#### **H. Structures Accessory to Group R-3**

1. Structures accessory to Group R-3 buildings will be valued at the same rate as private garages, except as provided in paragraph H.2 below.

2. All decks, piers and floats accessory to Group R-3 buildings will be valued at the same rate.

#### **I. Basements in Dwellings**

1. The BVD lists basements in dwellings as "semi-finished" or "finished". For the purpose of determining the valuation of basements in dwellings, the following rules apply:
  - a. Areas that have wallboard or finish floor shall be considered finished.
  - b. Basements that are finished and heated shall be valued the same as the rest of the dwelling.
  - c. The "semi-finished" valuation shall be used for heated basements that are unfinished.
  - d. The "unfinished" valuation shall be used for basements that are unheated and unfinished.

#### **J. Uncovered Structures and Unenclosed Areas**

The fee for uncovered and unenclosed structures such as plazas, piers, docks, platforms, multifamily residential and commercial decks, commercial floats, roof parking areas, and similar uncovered usable structures shall be computed using one-half the gross area of the structure times the cost per square foot of the appropriate occupancy and construction category. (See paragraph H above for R-3 decks.)

#### **K. Labs and Group H Occupancies**

Laboratory and hazardous materials storage areas in buildings may require extensive special equipment for the occupancy for life-safety purposes. For Group H occupancy storage and use areas with special alarm or mechanical exhaust requirements and for laboratories with special fume hoods (for flammable or corrosive vapors) or complex mechanical systems, the BVD per-square-foot value shall be multiplied by 1.1.

#### **L. Buildings of More Than Three Stories of Type I- and II-F.R. Construction**

The building valuation will be modified for buildings of Type I- and II-F.R. construction exceeding three stories of the following occupancies:

- a. Apartment buildings
- b. Banks
- c. Convalescent hospitals
- d. Hospitals
- e. Hotels and motels
- f. Medical offices
- g. Offices
- h. Public buildings
- i. Public garages, both enclosed and open
- j. Stores

For those occupancies, the total building valuation determined by the BVD per-square-foot values shall be modified by a factor CM, where:

$$CM = CB [1 + .005 (S - 3)]$$

CB = Total value of the building based upon floor area and costs per square foot as specified in the Table.

S = Number of levels in the building from the top of the foundation.

CM = Modified value based on 0.5% increase above.

## **VI. Accessory Mechanical Spaces**

### **Rule**

New floor area housing mechanical spaces shall be assumed to have the same dollar value per square foot as the occupancy to which they are accessory. If the mechanical space is accessory to multiple occupancies, the valuation of the largest occupancy shall be used.

## **VII. Establishing Use for the Record**

When a use is to be established for the record, application materials are sometimes routed to be checked for compliance with the appropriate edition of the Seattle Building Code (SBC).

In Section 22.900D.010, Table D-2 establishes the development fee for establishing use for the record. This rule clarifies how the amount of the fee will be determined.

Note that a Land Use fee will be charged according to Section 22.900C.010, Table C-1 in addition to the development fee.

### **Rule**

When an application for establishment of use that does not include construction work is routed for Building Code review, the permit fee is one and one-half times the base fee, and no plan review fee will be charged.

When the routed application does include construction work, the applicant will be charged a permit fee of 100% of the DFI plus a plan review fee of 100% of the DFI.

Even if the construction is of the type and extent that is typically approved subject to field inspection, the applicant will be charged a fee based on the value of the construction.

Regardless of the outcome of Building Code review, the Land Use fee will be charged.

## **VIII. Land Use Fees**

### **A. General Development Plan**

#### **Rule**

The General Development Plan fee shall be applied to the Northgate General Development Plan and to Major Phased Developments.

### **B. Zoning-only Review**

The 2000 Fee Subtitle combined the fee for zoning review with the hourly Land Use fee. This rule clarifies the fee that is charged for review of permits that require only zoning review.

#### **Rule**

Permits which require only zoning review shall be charged a minimum land use review fee of \$500.00, and shall be charged \$250.00 per hour for review hours in excess of two.

### **C. Master Use Permit — Fee for Review Prior to Application**

The Fee Subtitle authorizes DCLU to charge for land use review performed prior to the time the permit application is completed. This rule clarifies the time and amount of payment of fees for review conducted prior to application.

Section 22.900C.010.E states “In addition to the fees set in Table C-1, review time required on a project prior to, or in lieu of, an application will be charged hourly as determined by the Director”.

Footnote 11 to Table C-1 states “The pre-application conference fee covers a one hour conference. Additional pre-application review time will be charged at the hourly rate.”

The design review process and DCLU review time for applications undergoing design review begin prior to the time the application is submitted. Review for other types of projects may also occur prior to MUP application, most often though not always, for those projects for which a pre-application conference is held. The hourly fees will include, among other things, time spent after a preapplication conference, and time spent reviewing incomplete permit application materials.

#### **Rule**

At the time of complete Master Use Permit application, the applicant shall pay accrued hourly fees for land use review in excess of those included in the minimum land use fee.

The amount due at application is the minimum land use review fee, minus amounts paid prior to application, plus hourly fees for review conducted prior to application.

## **IX. Noise variances**

The fee for technical or economic noise variances as set forth in 22.900F.020 and Table F-2 includes an hourly project review fee. This rule clarifies what costs are covered by the hourly fee.

### **Rule**

The hourly project review fee includes, but is not limited to, time spent by DCLU staff reviewing application materials, attending public meetings and monitoring compliance with the terms and conditions of the variance if one is granted.

## **X. Miscellaneous and Special Fees**

Section 22.900B.020 gives the Director authority to recover costs of miscellaneous services. This rule establishes the amounts that will be charged for one of those services.

### **Peer Review**

#### **Rule**

When the Director determines the Department needs additional plan review expertise to ensure public safety in development projects with unusual design features, the applicant shall reimburse the Department for direct costs incurred in hiring the necessary consultants.

## **XI. Site Review**

Table D-SR of Section 22.900D.145 provides for fees for post-issuance site inspection and other review at \$125.00 per hour times the minimum number of inspections. It also provides that the minimum number of inspections will be determined according to a Director's Rule.

### **Rule**

The fee for post-issuance site inspection and other review provided for in Table D-SR shall be determined according to the table below.

<b>Post-Issuance Site Inspection and Other Review<sup>1</sup></b>			
<b>Type of Site</b>	<b>Minimum number of inspections (in hours of inspection time)</b>	<b>Minimum hours of additional review</b>	<b>Total hours</b>
1. Sites where temporary erosion control is required	1	0	1
2. Sites in Environmentally Critical Areas, other than liquefaction-prone and abandoned landfills, with special inspection	3	1	4
3. Sites with excavation deeper than 12 feet with shoring	3	2	5

<sup>1</sup> This table sets forth minimum numbers of hours. Time in addition to the minimums may be charged at \$125.00 per hour.

## **XII. Standard Plans and Factory-Built Structures**

Items 7 and 8 of Table D-2 specify the fees for standard plans and for factory-built structures. This rule clarifies how those fees are to be applied. The rule applies to (1) applications for approval of a factory-built structure, and (2) applications for approval of a standard plan that includes a factory-built structure.

### **Rule**

#### **A. Factory-built Structures**

The fee for factory-built structures is a permit review fee of \$125 and a plan review fee of \$125. In addition, a building fee calculated according to item 1 of Table D-2 shall be charged for the foundation and accessory structures.

For HUD-approved factory-built housing (housing bearing a "Red Seal"), the fee for the foundation shall not be charged.

#### **B. Standard Plans that Include a Factory-built Structure**

1. The fee for establishment of a standard plan that includes a factory-built structure shall be calculated according to the following.

(1) A permit fee of 100% of the DFI for the standard plan (Table D-2 item 7a), plus \$125 for the factory-built structure (Table D-2, item 8). The DFI shall be based on the value of the foundation and accessory structures only.

plus

(2) A plan review fee of 100% of the DFI for the standard plan (Table D-2 item 7a). The DFI shall be based on the value of the foundation and accessory structures only. No plan review fee for the factory-built structure will be charged for the application to establish the standard plan.

2. The fee for a permit to build according to the standard plan shall be calculated according to the following.

(1) A permit fee of 100% of the DFI for the standard plan (Table D-2 item 7c) plus \$125 for the factory-built structure (Table D-2, item 8). The DFI shall be based on the value of the foundation and accessory structures only.

plus

(2) A plan review fee of 40% of the DFI for the standard plan (Table D-2 item 7c) plus \$125 for the factory-built structure (Table D-2, item 8). The DFI shall be based on the value of the foundation and accessory structures only.

3. For standard plans that include HUD-approved factory-built housing (housing bearing a "Red Seal"), the fee for the foundation shall not be charged.
